

## Comments from Israel on DS457

1. Regarding Section 5.68, Israel strongly supports the inclusion of the material which appeared in Appendix III of the former draft and its elaboration in the draft Safety Guide DS475 (Arrangements for public communication in preparedness and response for a nuclear or radiological emergency).
2. Regarding Tables II.1-II.5, we would like to know if the information concerning the higher sensitivity of the embryo/fetus with regard to stochastic effects, as presented for instance in ICRP Publication 90, has been taken into account when developing the generic criteria presented in Appendix II (Tables II-2 – II-5)?
