

Document Preparation Profile (DPP)

1. IDENTIFICATION

Document Category NS-R-2 {Safety Requirement}

Working ID: DS 413

Proposed Title: Safety of Nuclear Power Plants: Operation

Proposed Action: Revision of document

Published Title/Date Safety of Nuclear Power Plants: Operation

Safety Series No.: NS-R-2

SS Committee(s): CSS

Technical Officer(s): Dominique Dubois

2. OBJECTIVE

The objective of the revision to NS-R-2 is to correct and/or improve the document content, based on feedback from Member States and from the application of Agency Safety Services.

3. BACKGROUND

NS-R-2 was first published in 2000 and has proven to be applicable for use as an international safety standard reference for conducting Agency Safety Services, particularly the Operational Safety Review Team (OSART) service. Many Member States have also adopted NS-R-2 as a basis standard for their national regulations in the area of safety of NPP operation. Over the past six years new emphasis has emerged in areas such as Long Term Operation, Plant Ageing, Periodic Safety Reviews, Probabilistic Safety Analysis and Risk Informed Decision Making processes. It is therefore necessary to reflect the Agency's safety requirements in these areas and correct and/or improve the document based on feedback from its application by both the Agency and Member States. A Technical Meeting was organized in April 2006 to provide advise on these emerging topics and on the revision of NS-R-2 in general.

4. INTERFACES

NS-R-2 has to reflect safety principles # 1, 3, 8 and 9 of SF-1. NS-R-2 will also have to be harmonized with the recently published GS-R-3 "Management Systems".

5. OVERVIEW

CONTENT (NS-R-2)

1. INTRODUCTION	
Background.....	
Objective	
Scope	
Structure	
2. SAFETY OBJECTIVES.....	
3. THE OPERATING ORGANIZATION.....	
Functions and responsibilities.....	
Structure of the operating organization	
Management of human resources	
Interface with the regulatory body.....	
Interface with external support organisations	
Physical protection	
4. MANAGEMENT OF OPERATIONAL SAFETY	
Safety policy	
Performance of safety related activities	
Monitoring and review of safety performance	
Human factors	
Qualification and training of personnel	
Emergency preparedness	
Accident management	
Fire prevention and protection.....	
Radiation protection and radioactive waste management.....	
Industrial safety	
Records and reports	
Feedback of operational experience	
5. PLANT COMMISSIONING.....	
Commissioning programme	
Preparation, approval, control and conduct of tests.....	
Interfaces with operations, maintenance, constructors and design engineering	
6. PLANT OPERATIONS	
Operational limits and conditions.....	
Operating procedures.....	
Operation facilities and operator aids	
Operating approaches and practices	
Shift arrangements.....	
Material conditions and housekeeping	
Chemistry	
Core management and fuel handling	
Periodic safety review	
7. PLANT MAINTENANCE	
Maintenance programmes.....	
Surveillance programmes	
Conduct of maintenance, test, surveillance and in-service inspection and work control.....	
Spare parts and materials.....	
Outage management	
8. PLANT MODIFICATIONS.....	
Plant modification programme	

Plant permanent and temporary modifications

9. LONG TERM OPERATION, EQUIPMENT QUALIFICATION AND AGEING MANAGEMENT

Management system of plant configuration and status

Long term operation

Equipment qualification (EQ).....

Ageing management.....

10. TRANSITION TO DECOMMISSIONING

6. PRODUCTION: Provisional schedule for preparation of the document, outlining expected dates for:

- Technical meeting for further development of the DS 413 on April 2006
- Approval on DPP by the Steering Committee- January, 2007
- Approval on DPP by TRANSSC Committee on March 2007
- Approval on DPP by the Safety Standards Committees NUSSC, RASSC and WASSC, April, 2007
- Technical meeting for further development of the DS 413 on September 2007
- Approval on DPP by the CSS, November, 2007
- Development: (consultant meetings, technical committee meetings)

- Approval on draft by the Steering Committee
- Approval by the Safety Standards Committees for submission to Member States for comments, October/November 2008
- Revision of draft by taking into account the Comments by the Member States, April, 2009
- Approval on the revised draft by the Steering Committee
- Approval by Safety Standards Committees for submission to the CSS, October 2009
- Endorsement by the CSS, March 2010
- Submission to Publications Committee for approval, March 2010
- Board of Governors, June 2010
- Target publication date, December 2010.
