Relevance	Comment No.	Para/Line No.	Proposed new text	Reason	Accepted	Accepted, but modified as follows	Rejected	Reason for modification/rejection
1	1	5.24	“If a discharge could cause significant public exposure outside the territory or other area under the jurisdiction or control of the State in which the discharge takes place, the operating organization should make an assessment of the radiological impacts of the discharges on the public and; as necessary, on the environment in these areas.”	“As necessary” should be deleted here because the impacts to the environment should always be taken into account. For example also in a desert a radioactive pollution could have an effect to people when dust is blown away.
