

## DS477 The Management System for the Predisposal and Disposal of Radioactive Waste

COMMENTS BY REVIEWER				RESOLUTION			
Reviewer: Radiation and Waste Safety Division (RWSD) Country/Organization: Republic of Korea / Korea Institute of Nuclear Safety Date: June 16, 2013							
Comment No.	Para/Line No.	Proposed new text	Reason	Accepted	Accepted, but modified as follows	Rejected	Reason for modification/rejection
1	General comments	<i>Guidance on “Leadership” in safety matters for the radioactive waste management should be clearly addressed in the draft Safety Guide, DS477.</i>	The Safety Guide should provide guidance for implementing Principle 3 (Leadership and management for safety) of SF-1 and the requirements of GSR Part 2 which is under development.	X			
2	2 <sup>nd</sup> Para. in Section 4	The Safety Guide is intended to be used by regulatory bodies, organizations that are directly involved in the <u>radioactive</u> waste management activities, and the suppliers <del>of the waste</del> of safety-related products that are required to meet some or all of the requirements to be established in GSR Part 2.	“Supply” is not an activity involved in the radioactive waste management, and “Suppliers of the waste” in the original text does not make any specific sense. The text could be revised by referring to Para. 1.14 of GS-G-3.3 and Para. 1.17 of GS-G-3.4.		x Modify as follows:  The Safety Guide is intended to be used by regulatory bodies, organizations that are directly involved in the <u>radioactive</u> waste management activities, and the suppliers <del>of the waste</del> of <u>nuclear</u> safety related products that are required to meet some or all of the requirements to be established in GSR Part 2.

3	General comments (Section 4)	<i>The scope of DS477 for predisposal management of radioactive waste should be clearly specified at an early stage of document preparation. For instance, it should be clarified whether or not DS477 is applicable to every specific activity related to the radioactive waste management as defined in the IAEA Safety Glossary (2007 Ed.). Applicability of DSS477 to the following areas may be of high interest: (1) transport, (2) discharge, (3) decommissioning, and (4) remediation.</i>	N/A	X			
4	General comments (Contents)	<i>Specific guidance on <u>“the role of management and the organizational structure to be used for implementing processes for all safety related activities”</u>, which was addressed in Para. 5.23 of SSR-5, should be developed in preparation of the draft and would be provided in SECTION 3 of DS477.</i>	N/A	X
